

HW01 Report — QA/QC Jobs · 20 Defects · Physical Product Testing

StudentID: 23127075
Student Name: Lê Trung Kiên
Course: Software Testing
Exercise: HW01
Submission Date: 04/06/2026

1) Requirement 1 — QA/QC Job Market 2026+ (40 pts)

1.1 Summary

- Total postings collected: 10/10
- Published within 60 days before submission: Yes
- Postings requiring AI/LLM/automation-AI skills: 8

1.2 Job Postings

1.2.1 Posting 01

- Job title: Business Analyst/Quality Assurance Analyst
- Company: Vion Consultants, Inc
- Location: Remote (primarily remote; occasional on-site in Baltimore, MD)
- Platform: SimplyHired
- Posting date: 01/06/2026
- Job URL:
<https://www.simplyhired.com/job/sZlt5OX6ynl8dQqiHuvfhuxrGj2L6sjsjSvNIQHlXln0TRQetvLm8g>
- Salary: From \$40.00 an hour
- Requires AI/LLM/automation-AI skills? Y (manual + automation QA context)

Job Description

Full Job Description

Location: Primarily Remote (some on-site visit may be required in Baltimore, MD)

Duration: 9 Months (possibility of extension)

Candidate Location: Candidates within the DC/MD/VA metro area are preferred

Job Summary

We are seeking a dynamic and detail-oriented business analyst/quality assurance analyst to join our innovative technology team. In this role, you will be at the forefront of ensuring the quality and functionality of our software solutions, collaborating closely with developers, business analysts, and stakeholders. Your expertise will drive the development of robust test plans, execute comprehensive

testing strategies, and facilitate seamless communication across teams to deliver high-quality products. If you thrive in a fast-paced environment and are passionate about software quality assurance and business analysis, this is your opportunity to make a meaningful impact.

Responsibilities

- Maintain requirements traceability across Strategic Brief, IA, and UX deliverables.
- Document IA requirements and validate user-flow definitions.
- Conduct stakeholder interviews and capture structured research outputs.
- Track content workbook entries and validate retain/edit/remove dispositions.
- Define mockup acceptance criteria and operate the defect log.
- Trace UX Recommendations back to research and data points
- Serve as primary QA lead across testing, defect management, and pre-launch verification.
- Author test plans and test cases for content edits, migration, redirects, and site testing.
- Validate content edits across up to 500 high-priority pages.
- Perform migration validation on a per-page basis.
- Conduct WCAG 2.1 AA accessibility QA and remediation verification.
- QA the redirect mapping for all 500 pages.
- Manage hyper-care defect intake, prioritization, and triage.

Required Qualification

- Minimum 7 years of combined Business Analysis and QA experience.
- Experience with content audits and content management workflows.
- Strong manual testing experience with exposure to automated testing.
- Proficient with defect tracking tools (Jira, Azure DevOps, or equivalent).
- Demonstrated accessibility testing exposure.

Preferred Qualifications

- ISTQB or CSTE certification.
- Drupal-based testing experience.
- Experience validating migrated content at scale.
- Hands-on experience with WCAG/Section 508 tooling (axe, WAVE, NVDA, JAWS).

Pay: From \$40.00 per hour

Application Question(s):

Will you now or in the future require sponsorship to work in the US?

Do you have experience performing accessibility testing?

Do you have experience with Jira, Azure DevOps, or equivalent?

License/Certification:

ISTQB or CSTE certification (Preferred)

Work Location: Hybrid remote in Baltimore, MD 21202

****Required Skills****

Requirements traceability, manual testing, automation-testing exposure, Jira/Azure DevOps, accessibility testing (WCAG), defect triage, stakeholder communication.

****AI Impact Analysis (1-2 sentences)****

This role shows QA expanding into cross-functional quality governance, not only testcase execution. AI copilots can help draft test artifacts, summarize defects, and speed traceability checks.

****Evidence****

![alt text](req1-images/req1-linkedin-posting-01.png)

1.2.1 Posting 02

- Job title: AI Chatbot Tester
- Company: Alignerr
- Location: Vietnam (Remote)
- Platform: LinkedIn
- Posting date: 28/05/2026
- Job URL: <https://www.linkedin.com/jobs/view/4420209646/>
- Salary: \$40/hr - \$120/hr
- Requires AI/LLM/automation-AI skills? (Y/N): Y

****Job Description****

About the job

About The Role

What if your opinion could make AI smarter, safer, and more helpful for millions of people? As an AI Chatbot Tester with Alignerr, that's exactly what you'll do. We're looking for curious, thoughtful individuals to engage with cutting-edge AI chatbots, evaluate their responses, and provide the human feedback that drives real improvement in AI systems.

This is a fully remote, flexible contract role — work on your own schedule, from anywhere.

Organization: Alignerr

Type: Hourly Contract

Location: Remote

Commitment: 10–40 hours/week

What You'll Do

Hold conversations with AI chatbots across a wide range of topics — from everyday questions to creative challenges

Rate responses for helpfulness, accuracy, tone, and safety

Identify issues such as factual errors, awkward phrasing, bias, or inappropriate outputs
Push the limits of AI with creative, nuanced, and challenging prompts
Record structured feedback that directly informs how AI systems are improved
Work independently and asynchronously on your own schedule

Who You Are

Naturally curious — you enjoy exploring ideas across different topics and asking great questions
Able to evaluate written responses critically and objectively
Clear and concise in your written communication
Comfortable navigating chat-based digital interfaces
Reliable and self-motivated when working independently
No technical background or prior AI experience required

Nice to Have

Experience in writing, editing, journalism, research, or customer service
Familiarity with AI tools or chatbot platforms
An eye for spotting subtle errors in logic, tone, or content

Why Join Us

Work on some of the most advanced AI projects in the world, partnering with top research labs
Fully remote and flexible — set your own hours and work from anywhere
Freelance autonomy: no micromanagement, no rigid schedules
Meaningful work that directly shapes the quality and safety of AI used globally
Potential for ongoing contracts and expanded project opportunities

****Required Skills****

AI/LLM evaluation, quality analysis, conversational testing, safety/accuracy review, structured feedback.

****AI Impact Analysis (1-2 sentences)****

This is a direct AI-era QA role where testing target is model behavior instead of only classical software flows. Human-in-the-loop evaluation becomes core quality control for LLM products.

****Evidence****

![alt text](req1-images/req1-linkedin-posting-02.png)

1.2.1 Posting 03

- Job title: Marketing QA Analyst
- Company: Mutual of Omaha
- Location: Remote
- Platform (LinkedIn/Indeed/...): SimplyHired
- Posting date: 10d

- Job URL:
<https://www.simplyhired.com/job/KddCc8sMwwLN4MqGnPHgyzWn7j4GU50x08IkaG0AF-HnpCDJBIIBLA>
- Salary: \$68,000 - \$97,000 a year
- Requires AI/LLM/automation-AI skills? (Y/N): N

****Job Description****

QA role validating marketing workflows, campaign quality, and production readiness in a remote setup.

****Required Skills****

Quality analysis, communication skills, campaign QA coordination, defect reporting, cross-team collaboration.

****AI Impact Analysis (1-2 sentences)****

Marketing QA roles show QA scope expanding beyond traditional app testing into content and campaign quality pipelines. AI can support faster anomaly detection and review prioritization.

****Evidence****

![alt text](req1-images/req1-linkedin-posting-03.png)

1.2.1 Posting 04

- Job title: Remote QA Tester Work From Home
- Company: Apply4U | Human-Assisted AI Job & Recruitment Platform
- Location: United Kingdom (Remote)
- Platform (LinkedIn/Indeed/...): LinkedIn
- Posting date: 11 hours ago
- Job URL: <https://www.linkedin.com/jobs/view/4421658202/>
- Salary: £13/hr - £16/hr
- Requires AI/LLM/automation-AI skills? (Y/N): Y (AI-assisted platform context)

****Job Description****

Remote QA testing role for validating product quality in work-from-home setup, with practical tester workflows around digital products.

****Required Skills****

QA execution, defect reporting, remote collaboration, structured testing practice.

****AI Impact Analysis (1-2 sentences)****

Even general QA-tester roles are now embedded in AI-assisted product ecosystems. AI tools can reduce repetitive testcase generation and speed defect classification.

****Evidence****

![alt text](req1-images/req1-linkedin-posting-04.png)

1.2.1 Posting 05

- Job title: Senior QA Analyst
- Company: Zwift
- Location: Long Beach, CA (Remote-eligible US locations)
- Platform (LinkedIn/Indeed/...): SimplyHired
- Posting date: 9 days ago
- Job URL: https://www.simplyhired.com/job/Hna9XHBa_Kh_Knfugud6Qt2EPSUDnPF-XcQkBUodtpTum8fs5mCqyg
- Salary: \$70,500 - \$110,000 a year
- Requires AI/LLM/automation-AI skills? (Y/N): Y (automation/API/CI context)

Job Description

Senior QA role driving test strategy, test coverage, and end-to-end release quality across software products.

Required Skills

Mobile QA (iOS/Android), API testing, Jira, regression testing, SQL/NoSQL validation, CI/CD integration, Agile collaboration.

AI Impact Analysis (1-2 sentences)

Senior QA roles increasingly blend manual validation with automation and platform-level telemetry. AI copilots can speed root-cause analysis and reduce repetitive regression effort.

Evidence

![alt text](req1-images/req1-linkedin-posting-05.png)

1.2.1 Posting 06

- Job title: Senior Test Analyst
- Company: Cognizant
- Location: Reston, VA (Remote)
- Platform (LinkedIn/Indeed/...): SimplyHired
- Posting date: 13 hours ago
- Job URL: https://www.simplyhired.com/job/Z384WERQ3uUYT3LmAcDqMvq7be7xD7HcPE8ILoBK1d45P_UUycFjSw
- Salary: \$53,477 - \$92,500 a year
- Requires AI/LLM/automation-AI skills? (Y/N): Y (automation/API testing)

Job Description

Senior test role focused on automation and end-to-end quality validation across functional, regression, smoke, and API testing.

Required Skills

Java, Selenium WebDriver, REST Assured, CI/CD tools (Jenkins/GitHub Actions), Jira, SDLC/STLC, Agile execution.

AI Impact Analysis (1-2 sentences)

This role highlights enterprise demand for automation-first QA with API depth

and CI discipline. AI assistants can accelerate script authoring and defect triage at scale.

****Evidence****

![alt text](req1-images/req1-linkedin-posting-06.png)

1.2.1 Posting 07

- Job title: Clinical Quality Assurance Analyst
- Company: Themesoft Inc
- Location: Albany, NY (Remote)
- Platform (LinkedIn/Indeed/...): SimplyHired
- Posting date: 12d
- Job URL:
<https://www.simplyhired.com/job/ptTM58YVddK9WzZn6iqn01UByaalq4gjIXIW73GUMQDNucEXbxgNUg>
- Salary: \$50 - \$55 an hour
- Requires AI/LLM/automation-AI skills? (Y/N): N

****Job Description****

Clinical QA role focusing on compliance-oriented review and quality controls in healthcare-related workflows.

****Required Skills****

Microsoft Outlook, customer service communication, quality control process adherence, remote coordination.

****AI Impact Analysis (1-2 sentences)****

Clinical QA emphasizes traceability and controlled processes where reliability is critical. AI can assist consistency checks but human oversight remains central for compliance-sensitive workflows.

****Evidence****

![alt text](req1-images/req1-linkedin-posting-07.png)

1.2.1 Posting 08

- Job title: Quality Assurance Specialist | \$11/hr Remote
- Company: Crossing Hurdles
- Location: Vietnam (Remote)
- Platform (LinkedIn/Indeed/...): LinkedIn
- Posting date: within 60-day window (promoted/current listing)
- Job URL: <https://www.linkedin.com/jobs/view/4417133986/>
- Salary: \$11/hr
- Requires AI/LLM/automation-AI skills? (Y/N): Y

****Job Description****

Remote QA specialist role for evaluating quality outcomes in AI-related digital workflows.

****Required Skills****

Quality assurance, analytical review, remote QA execution, issue validation.

****AI Impact Analysis (1-2 sentences)****

This role shows the blending of classic QA with AI-content evaluation tasks. Human QA remains critical for trust, consistency, and edge-case judgment.

****Evidence****

![alt text](req1-images/req1-linkedin-posting-08.png)

1.2.1 Posting 09

- Job title: Quality Assurance Specialist (Vietnamese) | \$11/hr - Remote
- Company: Crossing Hurdles
- Location: Vietnam (Remote)
- Platform (LinkedIn/Indeed/...): LinkedIn
- Posting date: within 60-day window (promoted/current listing)
- Job URL: <https://www.linkedin.com/jobs/view/4376739289/>
- Salary: \$10/hr - \$12/hr
- Requires AI/LLM/automation-AI skills? (Y/N): Y

****Job Description****

Quality assurance role focused on language-specific evaluation and remote quality validation processes.

****Required Skills****

QA analysis, linguistic quality checks, remote collaboration, structured defect reporting.

****AI Impact Analysis (1-2 sentences)****

Language-focused QA for AI systems is growing fast because model output quality varies by locale. Human evaluators provide nuance that automated checks still miss.

****Evidence****

![alt text](req1-images/req1-linkedin-posting-09.png)

1.2.1 Posting 10

- Job title: Audio Quality Assurance Specialist | \$50/hr Remote
- Company: Crossing Hurdles
- Location: United States (Remote)
- Platform (LinkedIn/Indeed/...): LinkedIn
- Posting date: 1 week ago
- Job URL: <https://www.linkedin.com/jobs/view/4417568336/>
- Salary: \$30/hr - \$50/hr
- Requires AI/LLM/automation-AI skills? (Y/N): Y

****Job Description****

Audio QA specialist role to evaluate quality and reliability of audio-related outputs/workflows in remote setup.

****Required Skills****

Audio QA, structured quality evaluation, defect discovery, analytical reporting.

****AI Impact Analysis (1-2 sentences)****

Multimodal AI products drive demand for specialized QA (audio/video/text), not only generic software testing. This role indicates QA specialization trend in AI-era job market.

****Evidence****

![alt text](req1-images/req1-linkedin-posting-10.png)

2) Requirement 2 – 20 Software Defects (2022–2026) (20 pts)

2.1 Summary

- Total defects: `20/20`
- AI/LLM-related defects: `` (must be `>= 5`)
- AI bias/hallucination analysis entries: `20/20` (one per defect)

2.2 Defects Table

> Paste from `hw01-software-defects-table-template.md`

3) Requirement 3 – Test Cases for ONE Physical Product (40 pts)

3.1 Device Declaration

- Device type: ``
- Brand: ``
- Model: ``
- Year: ``
- Serial number (masked middle 4 chars): ``

3.2 Required Device Evidence

- Device photo + student ID in same frame: ``

3.3 Test Cases (15 total)

> Paste from `hw01-physical-device-test-cases-template.md`

3.4 Test Execution Video Log (>=5)

> Paste from `hw01-test-execution-video-log-template.md`

3.5 Device Defect Log (target >=5)

> Paste from `hw01-device-defect-issue-log-template.md`

3.6 AI-missed Edge Cases (>=3 mandatory)

For each edge case AI missed, provide:

1. AI conversation screenshot proving AI did not generate it
2. Why AI likely missed it
3. Why it is critical for real-device QA

Edge Case ID	Test Case ID	AI Conversation Evidence	Why AI Missed It	Why It Matters
EC-01	TC-__	`<link/screenshot>`	`<reason>`	`<impact>`
EC-02	TC-__	`<link/screenshot>`	`<reason>`	`<impact>`
EC-03	TC-__	`<link/screenshot>`	`<reason>`	`<impact>`

4) CLO Mapping (G9.1, G9.3)

G9.1 – Understand

- Prompt AI tool for ISTQB-process mindmap
- Find and correct at least 3 mistakes
- Evidence file(s): `<path>`

G9.3 – Analyse

- Analyse AI-generated output and identify missing edge cases
- Evidence in Requirement 3.6

5) AI Critique (200-300 words, mandatory)

> Write 200-300 words:

- Where AI was wrong / biased / incomplete
- Why AI failed
- Principles learned for collaborating with AI in this HW

`<write your 200-300 words here>`

6) Mandatory Disclosure (mandatory)

Use this exact block and edit placeholders:

> "[Test cases / script / dataset / report] was initially generated by [AI tool name]; I reviewed and modified [section X], added [edge cases Y, Z]; [section W] was written entirely by me. The detailed AI Audit Report is attached as Appendix A. I confirm I did not use AI to generate any artifact listed in the prohibited category below."

7) Anti-Cheat Evidence Checklist

- [] Device photo with student-ID in same frame
- [] Execution videos contain your own voice narration
- [] All 10 job posting screenshots show your logged-in account/display name
- [] Prompt log `.md` with timestamps for every AI prompt

8) Self-Assessment (mandatory)

> Paste from `hw01-self-assessment-template.md`

9) Appendix A – AI Audit Report

> Paste entries from `ai-02-ai-audit-report-template.md`

10) Appendix B – Prompt Log

> Paste from `hw01-prompt-log-template.md`

11) Appendix C – AI Disclosure Form

> Paste from `ai-03-ai-disclosure-form-template.md`

12) Appendix D – AI Privacy & Responsible Use Checklist

> Paste from `ai-05-ai-privacy-responsible-use-checklist-template.md`
